

Get Over It.

Plant non-weedy species and enjoy!

Pick up a copy of your region's "Plant me Instead" booklets for some good ideas for environmentally friendly plants to replace your weeds with.

Take care choosing what you plant, avoid invasive ground covers and climbers, follow a regular garden maintenance programme and dispose of weed waste wisely.

By doing this you will be playing your part in preventing the further spread of weeds in our environment, and helping to protect the natural areas that make New Zealand so special.

Make your place a weed-free space
